Nuclear Engineering and Design 136 (1992) 409–411
North-Holland

Contents of Volume 136

CONTENTS OF ISSUE 136(1&2)

Preface, *T.E. Northup, J. Kupitz, A.C. Millunzi and C. Vivante* ix

Electricity as America enters the 21st Century, *L.E. Mills* 1
Global warming and nuclear power, *D. Bodansky* 7
Energy the enabler, in our changing world, *F.A. Koomanoff* 17
CO_2 and the world energy system: the role of nuclear power, *W. Fulkerson and J.E. Jones Jr.* 23
Nuclear safety and its deployment for human beings, *K. Taketani* 29
Trends in nuclear power reactor design and technology, *A.J. Goodjohn and J. Kupitz* 35
Prospects of SMSNR development in Switzerland and the influence of the evolution of district heating networks, *K. Foskolos and R. Brogli* 43
New perspectives and pre-feasibility results of the process heat HTR work, *J. Singh and H. Barnert* 51
Perspectives of modular high temperature gas-cooled reactor (MHTGR) on effluent management and siting, *T. Dunn, J. Cardito and J. Cunliffe* 57
SBWR 200, a low-cost NPP with high inherent safety features, *C.A. Goetzmann and W. Grüner* 65
Design of the Safe Integral Reactor, *R.A. Matzie, J. Longo, R.B. Bradbury, K.R. Teare and M.R. Hayns* 73
Process enhanced ultimate safety with the Geyser system, *P. Doroszlai and Z. Révész* 85
Chinese nuclear heating test reactor and demonstration plant, *W. Dazhong, M. Changwen, D. Duo and L. Jiagui* 91
Progress in design and verification of the AMPS nuclear-electric plant, *J.S. Hewitt and A.F. Oliva* 99
PRISM–liquid metal cooled reactor plant design and performance, *W. Kwant and C.E. Boardman* 111
Construction and operational experience with small and medium power reactors and expected improvements, *P. Dastidar and K.V.M. Rao* 121
Status and prospects of the HTR 500 based on the THTR 300 operation experience and recent R&D-work, *W. Theymann* 127
Integrated design of prestressed cast-iron pressure vessel and passive heat removal system for the reactor cell of a 200 MWth modular reactor, *B. Beine, V. Kaminski and W. von Lensa* 135
Passive heat removal from the core of small and medium sized pebble bed reactors, *K. Kugeler, P.-W. Phlippen, P. Schmidtlein and R. Swatoch* 143
The Nuclear Battery: a very small reactor power supply for remote locations, *K.S. Kozier* 149
Small molten-salt reactors with a rational thorium fuel-cycle, *K. Furukawa, K. Mitachi and Y. Kato* 157
PIUS – status and perspectives, *T. Pedersen* 167

0029-5493/92/$05.00 © 1992 – Elsevier Science Publishers B.V. All rights reserved

Market prospects of modular HTR in EEC countries, *F. Albisu, S.F. Garribba, J.C. Lefevre, D. Leuchs and C. Vivante* 179
Utility requirements for advanced LWR passive plants, *J.M. Yedidia and W.R. Sugnet* 187
Needs and potential applications of small and medium-sized light water reactors in Japan, *M. Uchiyama, K. Matsui and K. Yokoshiki* 195
Outlook for MHTGR project development, *D.P. Hoffman and L.D. Mears* 201
ALMR fuel cycle economics, *L.N. Salerno, M.L. Thompson, B.A. Hutchins and C. Braun* 205
Future potential of nuclear heat utilization in energy, economy and environment, *Y. Tadokoro, O. Sato, S. Yasukawa and T. Hayashi* 211
An advanced nuclear power plant for heavy oil exploitation in the Venezuelan Orinoco Oil Belt, *H. Carvajal-Osorio* 219
Utilization of process heat from the HTRM in the chemical and related industries, *M.K. Schad* 229
Technical and economical efficiency of energy generation with the Geyser system, *Z. Révész and P. Doroszlai* 237

Instructions to contributors 241

CONTENTS OF ISSUE 136(3)

Engineering Mechanics, Structures and Materials

Axial crack propagation in fuel pin cladding tubes, *I.J. Ford* 243
Complex variable boundary element method for torsion of hollow shafts, *S.I. Chou and M. Shamas-Ahmadi* 255
Investigation on cyclic crack growth behaviour of reactor pressure vessel steels placed and loaded in the core region of an operating boiling water reactor, *D. Anders and J. Föhl* 265

Thermal-Hydraulics and Related Safety

A phenomenological model of the thermal hydraulics of convective boiling during the quenching of hot rod bundles. Part I: Thermal hydraulic model, *R. Nelson and C. Unal* 277
A phenomenological model of the thermal-hydraulics of convective boiling during the quenching of hot rod bundles. Part II: Assessment of the model with steady-state and transient post-CHF data, *C. Unal and R. Nelson* 299
Phenomena-based thermal-hydraulic modeling requirements for systems analysis of a Modular High Temperature Gas-Cooled Reactor, *G.E. Wilson, D.C. Wadsworth, B.G. Miller, L. Lommers, P. Kroeger, M. Olszewski, R. Kochan and K. Liebelt* 319
Development of a phenomena identification and ranking table (PIRT) for a postulated double-ended guillotine break in a production reactor, *R.G. Hanson, G.E. Wilson, M.G. Ortiz and D.P. Griggs* 335
Measurement of three-dimensional wave form and interfacial area in an air–water stratified flow, *H.C. Kang and M.H. Kim* 347
The limits of conditional stability for single-phase natural circulation with through-flow in a figure-of-eight loop, *P.K. Vijayan and A.W. Date* 361

Extensions to the approximation functions for the fast calculation of saturated water properties, *W.J. Garland, R.J. Wilson, J. Bartak, J. Cizek, M. Stasny and I. Zentrich* 381

Reactor Engineering, Waste Technology, Instrumentation and Control

Simulation of fast breeder reactor noise based on two-channel core model, *T. Tamaoki and R. Takahashi* 389

The effect of aluminum corrosion on the Advanced Neutron Source Reactor fuel design, *G.L. Yoder, N.C.J. Chen, D.K. Felde, W.R. Nelson and R.E. Pawel* 401
